MBW Facilities

Facilities management – 24hr callout

Issue: Phone lines were cut after the company providing their existing telephone lines failed – could not receive any incoming calls from their customers.

Solution: Connect Everywhere quickly provisioned new lines to be installed at the company's premises. MBW were receiving calls again within 72 hours.

Connect Everywhere also immediately provided MBW with a Platinum 08 number - 08719 51 51 51 - that customers could ring straight away. The number was easily memorable and provides complete disaster recovery to protect them from the same situation occurring in future. Never again will MBW Facilities be left without incoming

KSR Logistics

Haulage and distribution

Issue: Spending too much on their mobile phone plan.

Solution: After assessing KSR's monthly usage Connect Everywhere found that the talkplan they were on was too high even allowing for their requirement for additional users.

Connect Everywhere provided a brand new talkshare on the Orange network at a cheaper price but with more users with benefits such as Free handset insurance and extra landline minutes.
